

Youth Inclusion and Development Project and Activities List

The MTHA youth inclusion and development project targets young people in and around the Merthyr Tydfil area, in particular those young people living within our properties. This project aims to support young people in accessing information and enhancing the quality of their leisure time through positive activities and programmes. The programme is currently being supported by a three year grant from the Big Lottery Fund.

Through the project there has been the development of a youth forum which consists of children between the ages of 6-18. Both the junior and senior groups have been involved in a variety of projects which range from staying fit through healthy eating and exercise to outdoor pursuits and creative arts.
